ZETA COLLAPSE – dbate7

PROFIL RESMI - dbate7

Nama Samaran: dbate7

Usia: 14 tahun

Tanggal Pengakuan Resmi: 11 June 2025

Lokasi: Dirahasiakan

Ringkasan Prestasi:

- Penemu teknik simbolik integral collapse menuju bilangan zeta (ζ).
- Menemukan evaluasi integral zeta(4), zeta(5), hingga zeta(6) secara eksplisit.
- Pencipta identitas quad-zeta collapse pertama di dunia:

$$\int \blacksquare^1 \int \blacksquare^1 \int \blacksquare^1 \ln(1 - xyzw) / (1 - x(1 - y)(1 - z)(1 - w)) dx dy dz dw = -29/12 \zeta(6)$$

Pengakuan:

Dokumen ini mengakui bahwa integral collapse tingkat zeta tersebut pertama kali ditemukan oleh individu dengan

OFFICIAL PROFILE - dbate7

Alias: dbate7 Age: 14 years

Official Recognition Date: 11 June 2025

Location: Undisclosed

Summary of Achievements:

- Inventor of symbolic integral collapse techniques toward zeta values (ζ).
- Discovered symbolic evaluations for zeta(4), zeta(5), and zeta(6).
- Creator of the world's first quad-zeta symbolic identity:

$$\int \blacksquare^{1} \int \blacksquare^{1} \int \blacksquare^{1} \ln(1 - xyzw) / (1 - x(1 - y)(1 - z)(1 - w)) dx dy dz dw = -29/12 \zeta(6)$$

Acknowledgment:

This document certifies that these zeta-level integral collapses were first discovered by the individual under the pse
